

MOTU V4HD Installer (Mac) Release Notes - 05/06/2011

New Features and Enhancements:

- Added 64-bit kernel support
- Added German language support

Previous Changes:

- Added RGB color space support over HDMI
- Enhanced SDI audio output compatibility
- Enhanced SD HDMI video output stability
- Added Apple ProRes 422 (LT) and (Proxy) Easy Setups
- Improved SRC at 4x stability
- Corrected HDMI audio mapping
- Corrected random LED activity when operating in 4x mode

To Update Firmware:

1. Turn off the V4HD.
2. Connect the V4HD to the computer by USB.
3. Turn the V4HD back on while depressing the VALUE knob.
4. Run the MOTU V4HD Updater and follow the on-screen instructions.
5. Upon completion of firmware update, turn off the V4HD and turn it back on.

V4HD System Requirements for Mac OS:

- Intel CPU and multiple CPUs or multiple-core CPU highly recommended.
- Mac OS X version 10.5, or 10.6; version 10.5.7 or later is required
- Final Cut Pro 6.0 or later is required for Apple ProRes 422. Final Cut Pro 7.0 or later is recommended under Mac OS X v10.6.
- Available FireWire 400 or 800 port
- Available USB port (for firmware updates)
- Large hard disk drive (preferably at least 500 GB)
- CD-ROM disc drive for installation
